PROJECTS

LIUSDEVPORTFOLIO.NETLIFY.APP

06/2022

- This is my Portfolio page. It is designed in the style of Glassmorphism, carefully invested in layout, colors, UI/UX,... It is also have responsive and compatible with animations on most devices.
- Role: Front-End.
- Technologies used: HTML, CSS, JS.
- Github: github.com/LiusDev/TheBand

QUYDXTHEBAND.NETLIFY.APP

03/2022

- This is my first project while learning Front-End programming. It is a website intro to a band.
- Role: Front-End.
- Technologies used: HTML, CSS, JS.
- Github: github.com/LiusDev/MyPortfolio

SKILLS

- Languages: Vietnamese, English.
- Familiar with HTML, CSS and JavaScript.
- Basic knowledge of C and Java.

EDUCATION

FPT University

09/2021 - Present

- Major: Software Engineering.

ACTIVITIES

Member of JS Club - Japanese Software Engineers

05/2022 - Present

- The Japanese Software Engineers Club is a gathering place for those who are passionate about Japanese and programming at FPT University.
- Role: Vice President - Support President in the club management, delegate tasks to club officer team, ensuring they understand their responsibilities and motivating them to succeed.

JS Club Codefest 2022

08/2022

- Codefest 2022 is a JS Club academic event that provides students who are interested in information technology with an intellectual playground by creating algorithms for bot and having them compete against one another. Following the competition, I gained valuable experience in teamwork and project management.
- Role: Contestant.

JS Club Algorithm Arena 3.0

04/2022

- This is an academic competition hosted by JS Club to improve programming expertise, particularly algorithms. After the competition, I improved my collaborative abilities and putting algorithms into reality.
- Role: Contestant.
